Part III: Detailed Office Action

Finality in this application is **WITHDRAWN**.

New rejections and objections apply.

Formal Matters:

5 The specification is objected to because applicants have not filed drawings (copies or original) that are in compliance with 37 C.F.R. § 1.84 in this reissue application. Applicants are notified that the Patent Office no longer transfers drawings from the patent file in a reissue proceedings. See MPEP 1413. Correction is required.

10 ✓ Claim 11 is objected to under 37 C.F.R. § 1.173(b)(2) as being improperly amended; “(b)” should not be underlined. Correction is required.

✓ A large volume of art was cited in the patent of which this is a reissue. Applicants are requested to make that art of record in this case, using a form PTO-1449.

15

Objections and Rejections under 35 U.S.C. §112:

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

20 Claims 15-17, 19, 21, 23-26, 29-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

✓ Claims 15-17, 19 and 21 are indefinite because claim 8, from which they depend, uses the plural “cellular hosts”, whereas claims 15-17, 19 and 21 limit said hosts in the singular only.

25 Claims 23-24, 31 and 46 are indefinite for reciting “an amino acid sequence...”. Such would seem to imply that there is more than one sequence in each figure; it is not clear whether the sequences of the figures must be present in their entirety, or whether the claim might include portions thereof, e.g. without the signal sequence. Claim 46 is further indefinite as it is not clear how

many fragments might comprise the polypeptide, nor what the minimum size of said fragments might be. It is noted that without recitation of a minimum size, the claims could be construed to read on a fragment encoding as little as a dipeptide.

Claims 44 and 46 are improperly dependent upon claim 1, which is drawn to a composition,
5 ✓ and not to a nucleic acid (compound).

The remaining claims are rejected for depending from an indefinite claim.

✓ Claims 27-28 are indefinite as claims 4 and 5, from which they depend, are drawn to compositions, and not to nucleic acids.

10

Advisory Information:

Claims 1-10, 12-14, 18, 20, 22, 27, 28 and 49 are allowable.

Claim 11 is objected to.

15

Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 5,405,942 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

20 Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.

25

Applicant is notified that any subsequent amendment to the specification and/or claims must comply with 37 CFR 1.173(b).
